Multan, the seventh largest city of the country by population has a profound history dating back to almost 5000 years. Multan has grown to become one of the most influential political and economic centers of Pakistan. The city of shrines, whose architecture dates back to the Muslim conquest, has tapering walls, domes, glazed tile decoration on the exterior, as well as wooden canopies, decorated with carving and grilles made of marble and ornamented with beautiful geometric designs.

The culture and tradition of Multan is evident in DHA Multan’s futuristic developments. From blue in the tiles of DHA Villas to the slabs of our magnificent entrance, from wood carved grilles to a chandelier of camel art origin in The Arena, every advancement has the DNA of Multan’s rich history.

Project Secretary’s Interview

Col ® Waheed Khan

Q1. Please tell us something about yourself?
Ans. I am Col ® Waheed Khan and I have been the Project Secretary of DHA Multan from the past couple of years.

I was born in Sargodha at a time when there were no private education institutions like today, hence I went to a government school and college. In October 1988, at a very young age of 19, I joined the Pakistan Army in one of the oldest and decorated infantry units in the Punjab Regiment. As a young officer, like anyone, I was also very passionate and outgoing. While on postings, I got a chance to experience the beauty of Pakistan; from the Sleeping Beauty of Quetta, to the K-2 base camp in Gilgit Baltistan, to the mesmerizing scenarios of Pearl, Neelam and Leepa Valleys in Azad Kashmir to the great Khyber Pass, I felt the hot chill of Cholistan on my skin and enjoyed the chilly nights of Tharparker.

Apart from my essential military qualifications, I did my MBA in HRM and MA in Political Science during the service. To be honest, I would love to be a school teacher in my second life.

Q2. How do you maintain work / life balance?
Ans. It’s very difficult to maintain balance between the two and not possible without the support from the family. I am very fortunate to have a supportive family due to which I am able to keep my work life separate from my personal life.

Q3. What are your three biggest accomplishments?
Ans. Having served my nation would definitely top the list. I’ve also had the honour of commanding an infantry unit in the combat zone for two years and have seen life and death very closely. Having seen so much in life, I think I’m in a very good place today here at DHA Multan. It’s a new chapter that I wish to see and explore further.

Q4. What is your philosophy towards your work?
Ans. Briefly, I would sum it up as, “Hard work always pays off.” I try to listen to the people and their problems, address them from every possible angle and come up with solutions that are effective and quick.

Q5. How do you define success and how do you measure up to your own definition?
Ans. To me, success is something you achieve through strong leadership and team play. Only a good leader can build good teams to produce good results and every organization should focus on nurturing and developing their fresh blood to grow as great leaders.

Q6. What are your greatest strengths and weaknesses?
Ans. I’d say that my greatest strength would have to be the patience that I’ve learnt over many years of service. You can only move forward and plan for the future if you’re calm enough to take sane decisions in difficult situations. My weakness is that I am a perfectionist. I think this characteristic sets you back in a lot of things even if they are simple ones.

Q7. Do you believe in saving the environment? If yes, how are you practicing it in DHA Multan?
Ans. Environment protection is our future. It’s the only thing we all need to focus on. DHA Multan in collaboration with Pakistan Army’s initiative of ‘Sarsabz-o-Shadab Pakistan’ has launched a massive plantation drive.

Q8. DHA Multan has been quite a successful project. What would you like to say about that?
Ans. DHA Multan is a gift for the people of Southern Punjab. It has brushed away the perception of an outdated old city by giving its people a newer, cleaner and greener living concept. I believe DHA Multan is adding beauty and serenity to the Blessed City of Saints.

Q9. How do you and your team deal with new challenges?
Ans. DHA is already an established brand name in the real estate market. Our leadership strongly believes in quality, reliability and trust, and our team is always busy taking up new challenges and achieving the desired goal in accordance with these fine characteristics.

Q10. Where do you see DHA Multan in the next five years?
Ans. I see DHA Multan as a blissful living society, taking the blessed City of Multan to greater heights. I hope to see DHA Multan as the most sought after destination in Southern Punjab in the near future. Inshallah soon, people of Multan will get to see its green effects.

Q11. When will the project be liveable?
Ans. Construction of an international standard 18 Hole Signature Championship Golf Course by the legendary golfer Sir Nick Faldo coupled with his international standard coaching academy is a giant leap towards introducing Pakistan on the World golfing map and we look forward to share ‘Rumanza’ with everyone.

Q12. What was the main motivation behind inducting an international golf player / designer, Sir Nick Faldo to design the golf course in DHA Multan?
Ans. Cricket is more of a passion than just a sport for the people of Pakistan. Wasim Akram Cricket Academy in DHA Multan will serve to be a great opportunity for the youngsters in Southern Punjab to represent Pakistan in the national team.

Q13. What is the main objective in establishing a cricket academy in DHA Multan?
Ans. DHA Multan is planning to have its own education city that is much needed in the region. SICAS Kids Campus with its purpose built smart campus will be commencing its first academic session from August/September 2019. Also, a sufficient amount of land has been earmarked for Foundation University Campus. Similarly, the request from NUML University Campus is also under process.

Q14. Please let us know about the educational facilities planned for DHA Multan?
Ans. DHA Multan is in continuous competition with itself. It always strives to achieve the next level of developmental standards. I think DHA’s strict adherence to the by-laws and its reliability with consistency makes DHA unique and sets it apart from all its other competitors.

Q15. In your point of view, what makes DHA Multan stand out from other housing projects of our country?
Ans. DHA in continuous competition with itself. It always strives to achieve the next level of developmental standards. I think DHA’s strict adherence to the by-laws and its reliability with consistency makes DHA unique and sets it apart from all its other competitors.

Inshallah soon, people of Multan will get to see its green effects.
